P2  
only
1. (Amended) A method, comprising steps of:
    - (a) with at least one device supported by a user while the user is in locomotion on foot, determining at least one foot contact time of the user for at least one footstep taken by the user;
    - (b) comparing a variable having the at least one determined foot contact time as a factor therein with a threshold value; and
    - (c1) if the variable is one of greater than or less than the threshold value, determining that the user is walking; and
    - (c2) if the variable is the other of greater than or less than the threshold value, determining that the user is running.
